Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The indicated allowability of claims 1-5, 7-10, 12-15 and 17-18 is withdrawn in view of the newly discovered reference(s) to Levin et al. (US 6686911). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 7-10, 12-14 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Levin et al. (6686911)).

Levin discloses a mouse device (col. 23, lines 4-6) comprising an audio wheel (col. 5, lines 34-40) for adjusting a volume of an audio output and for adjusting a radio frequency (col. 6, lines 43-50). Levin further discloses fast forwarding through a current audio selection (a current volume selection) while the audio wheel is depressed while simultaneously being moved forward (col. 6, lines 43-50; col. 7, lines 1-4).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2675

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5, 10, 15 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levin et al. (6686911) in view of Nakazato et al. (JP409162768).

Levin does not disclose toggling a mute in response to the audio wheel being depressed twice

Nakazato discloses using a single control device (a switch) for generating a multiple functions in response to the numbers of time the control device being pressed. Nakazato further discloses generating a mute function in response to the control device being depressed twice.

It would have been obvious to one ordinary skill in the art to use Nakazato's double depress means in Levin's audio wheel for controlling the mute of the audio output. This would have been obvious because Nakazato teaches improving the operability by decreasing the number of manual setting members for various functions (see Abstract of Nakazato).
